

## CE-013 - Servo motor (to be used with former units)

**Spare Part Number:** CE-013

**Net Weight:** 0.00kg

**Net Dimensions:** 0.00cm x 0.00cm x 0.00cm

**Technical Datasheet:** [Protected Link](#)

### Description

## CE-013 Servo Motor (Fixing holes to be prepared in the factory)

**Please note:** This part is not a direct replacement for CE-113.

**Prior to ordering make sure you check what part is currently installed in your equipment.**

Servo motors or “servos”, as they are known, are motors paired with a position encoder that provide position and speed feedback with high precision. They are controlled by a Servo drive which monitors the feedback from the servo motor and automatically adjusts its output to correct for differences between the commanded value and actual.

Note: Fixing holes to be prepared in the factory.
